TEST REPORT

Product: Wet Grinder
Model: Tusker Proto Sample
Part Description: Full Unit
Supplier: Gates
No of Sample: 2No's
Reason for test: New Belt (Micro -V) validation purpose.

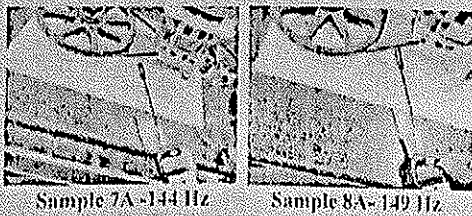

Location: DQ lab
Report No: 11/2024-10
Date: 09 Oct 2024
Rated Watts: 150W

Sample ID	Products	Test Protocols	Sample Given Date	Start Date	Total Completed Hrs.	Before Belt Tension	Until Now Belt Tension	Status	Remarks
07A	Wet Grinder Tusker 150W Proto	As per the internal procedure, the Tabletop Grinder should withstand 500 hrs. 12 hrs of Continuous Running the Endurance Test (Worst Condition)	08-Jul-24	22-Jul-24	707	185 Hz	144 Hz	Under Process	Has completed 500 hours of the endurance test as per standard and is currently running beyond 707 hours. The belt condition has shown no issues so far.
08A	Wet Grinder Tusker 150W Proto	Endurance test for 60 minutes in the ON condition and 30 minutes in the OFF condition. As per the internal procedure the Tabletop Grinder should withstand 500 Hours	31-Jul-24	07-Aug-24	345	185 Hz	149 Hz	Under Process	The endurance test has run for 345 hours, but according to standards, it should run for 500 hours. Belt feedback can be said after the remaining 155 hours of the endurance test. The belt condition has shown no issues so far.

Before Belt Tension Images:

Until Now Belt Tension Images:

Result:

- > Sample 7A Endurance Test OK.
- > Sample 8A Endurance Test can be said after the remaining 155 hours of the endurance test. So far, no issue, but tension dropped from 185 Hz to 149 Hz.
- > We don't know the minimum and maximum belt tension, so I asked the R&D team to arrange for the test certificate from supplier.
